Professional Summary

Software Engineer with 5 years of experience building web applications across fintech, e-commerce and digital products. Experienced in React, TypeScript, Blazor and Vue, with a strong focus on component development, API integration and reliable software delivery. Skilled in collaborating across engineering, QA and design teams, anticipating technical challenges and delivering secure solutions in Agile environments.

Professional Experience

VFX Financial Remote
Frontend Engineer *May 2024 – Present*

- Core frontend engineer for a centralised broker platfom supporting payments, deposits, FX trading, swaps and routing rules, developing complex financial workflows using Blazor.
- Collaborate with backend engineers across Payments, Deposits and Trading teams, alongside QA engineers and UI/UX designers, to deliver integrated features across financial services.
- Proactively contribute to technical refinement, identifying dependencies, edge cases and implementation risks, and proposing solutions before development and production.
- Implement and maintain security-related functionality, including permissions, role-based access control and input validation, within a regulated fintech environment.
- Work with xUnit, GitHub Actions CI/CD pipelines and multiple deployment environments, including development, pre-production and production.
- Contribute to Agile planning, refinement and retrospectives, adapting feature delivery to evolving business and compliance requirements.
- Adopted Claude Code in feature development workflows and contributed to refining prompts and reusable skills to improve delivery efficiency, reinforce security practices and reduce AI-generated errors.

Prozis Maia, Portugal
Frontend Developer *Apr 2023 – May 2024*

- Led frontend development within a small email marketing team, maintaining and extending an internal campaign management application built with Vue 2.
- Initiated the migration from Vue 2 to Vue 3 to modernize the frontend codebase and support future development.
- Developed reusable HTML email components, ensuring consistent rendering and compatibility across email clients.

Codepoint Braga, Portugal
Junior Software Developer *Sep 2021 – Mar 2023*

- Developed and maintained responsive web interfaces using React, collaborating with designers to implement UI/UX specifications for client applications.
- Contributed to full-stack applications using C#, Blazor, Azure Functions and MySQL, developing and integrating APIs to support application functionality.
- Collaborated with development teams in an Agile environment to deliver maintainable, production-ready web applications.

Technical Skills

Languages: TypeScript, JavaScript, C#, HTML, CSS

Frameworks & Libraries: React, Next.js, Blazor, Vue.js, .NET

Databases: MySQL, MongoDB

Tools & Testing: Git, GitHub Actions, xUnit, Docker, Claude Code

Practices: CI/CD, REST APIs, Agile/Scrum, Code Review, Role-Based Access Control, Input Validation

Selected Projects

Wedding Management Application | Next.js, React, MongoDB

Developed a full-stack web application to manage wedding invitations, RSVPs, guest seating, administration and photo uploads. Integrated authentication using NextAuth and transactional emails using Resend.

Education & Certifications

Instituto Politécnico do Cávado e do Ave Portugal
CTeSP – Web Development and Multimedia *2020 – 2022*

English Proficiency: EF SET English Certificate – C2 Proficient (81/100)
